

The background of the advertisement is a close-up photograph of a dark green, textured surface, possibly a piece of fabric or a wall, with a diagonal line of light-colored, perforated material running across it. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and texture.

Collection Spring Summer 2022

bags and accessories | made in France

HIT THE ROAD JACK, 2022 HERE WE COME

Paul Droulers and Sophie Rénier - founders of Jack Gomme - are inner adventurers.

With their unwavering desire to create light and pragmatic bags, they see this accessory as symptomatic of their values and therefore of those who carry them.

On Paul's boat, they often set sail with friends, whether they are seasoned or novice sailors, it does not matter. With the goal of reaching the bay of Fornells in Menorca, nothing really stops them, whether they face raging Spanish thunderstorms or the repeated violent Mistral winds.

They are whole, persevering, and of boundless simplicity and generosity.

Today, we can feel the future reaching out to the whole world.

With this in mind, Paul and Sophie wanted the new Summer 2022 collection true to them, as always, but with a particular emphasis on their essential values, now more than ever.

Jack Gomme's new Summer 2022 collection was shaped around the values that have made the reputation of the brand since 1985: lightness, solidity, impeccable craftsmanship and urban practicality.

Today more than ever, Sophie Renier and Paul Droulers want to offer bags that meet the needs and concerns of an everyday life, which accompany us in our long-awaited trips and which meet our eco-responsible expectations.

Indeed, to complete its evolution, the classic LIGHT line is now 100% vegan. As for the ESCAPE line, unisex and pragmatic, designed for the ever-moving urban world and to escape outside city walls - it is, for the first time, also available in the Seaqual Yarn material. Seaqual Initiative is a collaborative community fighting against plastic pollution. This material has OEKO-TEX, Class 100 and GRS certifications.

Meanwhile you will find within the ATELIER line leather and coated linen bags - including a new style born from a collaboration with the Japanese designer, Yukari Miyamoto.

Paul has also developed new leather models, including the small Yvon cross body bag, available in cheerful and warm colours, as well as a new selection of small leather goods such as phone holders and key rings.

Meanwhile the ATELIER line offers bags in linen - including a new model born from a collaboration with a Japanese designer - and in leather.

Paul's passion for the sea and the great outdoors is mirrored in the codes - lightness and resistance of the materials used. The colors and shapes, so dear to Sophie, are found especially this season in new leather good models. Working with this noble material that is leather without distorting it by using natural and non-abrasive products remains the primary desire. For this, the leather is carefully selected in the best tanneries of France and Italy.

ATELIER Yvon *Shoulder bag*
